7. (Currently Amended) In an Internet Portal system, a method for providing summaries of information personal to the one or more of a plurality of subscribing ~~user~~ users, stored at secure WEB sites specifically authorized and specified by a subscriber ~~the subscribing users~~, URLs for which are maintained for individual subscribers ~~ones of the subscribing users~~, the method comprising steps of:

-3-

- (a) configuring a summary software agent executable on the Portal to access the URLs, wherein the URLs are Web site addresses at secure servers maintaining personal financial accounts for the subscriber ;
- (b) retrieving information from individual ones of the WEB sites accessed according to pre-programmed criteria specific to each subscriber; and
- (c) providing the information to the ~~subscriber~~ subscribers;
wherein automatic secure logins for retrieving the information from the secure Web sites are performed on behalf of, and transparent to the subscribers according to data stored for each subscriber at the Portal.

8. (Original) The method of claim 7 further comprising a step for the subscriber to configure and initiate, via a configuration and initiation interface, a summary search.

9. (Original) The method of claim 7 wherein the summary searches are configured for individual clients as templates stored and retrieved at the Internet-connected server.

10. (Original) The method of claim 7 wherein information retrieved in a summary search is stored to be retrieved by the subscriber.

11. (Original) The method of claim 7 wherein information retrieved in a summary search is downloaded immediately to the subscriber.

12. (Cancelled)
